

Overview and Literature

Bullets indicate material included in the reader, articles available electronically through the library are indicated by **a**

Research question and design

- Freedman, D., Pisani, R., & Purves, R. (1998). *Statistics* (3rd ed.). Controlled experiments and observational studies (pp. 3–28). New York: Norton.
- Cochran, W.G. (1983). *Planning and analysis of observational studies*. Variation, control, and bias (pp. 1–14). New York: Wiley.
- Rosenbaum, P.R. (2005). Observational study. In B.S. Everitt & D.C. Howell (Eds.), *Encyclopedia of statistics in behavioral science* (pp. 1451–1462). Chichester, UK: Wiley.
- a** Kass, R.E. (2011). Statistical inference: The big picture. *Statistical Science*, **26**, 1–9.
DOI 10.1214/10-STS337

Data inspection

- a** Wilcox, R.R. & Keselman, H.J. (2003). Modern robust analysis methods: Measures of central tendency. *Psychological Methods*, **8**, 254–274.
DOI: 10.1037/1082-989X.8.3.254
- a** De Leeuw, E.D., Hox, J. & Huisman, M. (2003). Prevention and treatment of item nonresponse. *Journal of Official Statistics*, **19**, 153–176.
<http://www.jos.nu/Articles/article.asp>
- a** Schafer, J.L. & Graham, J.W. (2002). Missing data: Our view of the state of the art. *Psychological Methods*, **7**, 147–177.
DOI: 10.1037/1082-989X.7.2.147

Estimation and hypothesis testing

- a Christensen, R. (2005). Testing Fisher, Neyman, Pearson, and Bayes. *The American Statistician*, **59**, 121–126.
DOI: 10.1198/000313005X20871
- a Snijders, T.A.B. (2001). Hypothesis testing: Methodology and limitations. In N.J. Smelser & P.B. Baltes (Eds.), *International encyclopedia of the social & behavioral sciences* (Vol. 10, pp. 7121–7127). Amsterdam: Elsevier.
DOI: 10.1016/B0-08-043076-7/00737-3
- a Cohen, J. (1992). A power primer. *Psychological Bulletin*, **112**, 155–159.
DOI: 10.1037/0033-2909.112.1.155
- a Kirk, R.E. (1996). Practical significance: A concept whose time has come. *Educational and Psychological Measurement*, **56**, 746–759.
DOI: 10.1177/0013164496056005002

Bayesian statistics and testing

- Maindonald, J. & Braun, J. (2003). *Data Analysis and Graphics Using R: An Examplebased Approach*, pp. 100–103. Cambridge: Cambridge University Press.
- a Iversen, G.R. (1984). *Bayesian Statistical Inference*, Sage University Paper Series on Quantitative Applications in the Social Sciences, series no. 07-043, pp. 7–17. Beverly Hills, CA: Sage Publications.
- a White, I.R., Royston, P., & Wood, A.M. (2011). Multiple imputation using chained equations: Issues and guidance for practice. *Statistics in Medicine*, **30**, 377–399.
DOI: 10.1002/sim.4067
- a Berger, J.O. (2000). Bayesian analysis: A look at today and thoughts of tomorrow. *Journal of the American Statistical Association*, **95**, 1269–1275.
DOI: 10.1080/01621459.2000.10474328

Generalized Linear Models and Diagnostics

- Faraway, J.J. (2005). *Linear models with R*, pp. 53–75. Boca Raton, FL: Chapman & Hall, CRC Press.
- a Agresti, A. (2015). *Foundations of Linear and Generalized Linear Models* (Sections 1.1-1.2; 2.5-2.6; 4.1; 4.3-4.5.1; 4.6-4.7). Hoboken, NJ: Wiley.

Validity and Generalizability

- Maxwell, S.E., & Delaney, H.D. (2004). *Designing experiments and analyzing data: A model comparison perspective* (2nd ed.). Threats to the validity of inferences from experiments (pp. 22–32). Mahwah, NJ: Erlbaum.
- a Cohen, J. (1990). Things I have learned (so far). *The American Psychologist*, **45**, 1304–1312.
DOI 10.1037/0003-066X.45.12.1304
- a Kass, R.E. (2011). Statistical inference: The big picture. *Statistical Science*, **26**, 1–9.
DOI 10.1214/10-STS337
